Subject: CAASPP--No Issues with 2016-17 Student Scores

Measuring the Power of Learning.™

Dear LEA CAASPP Coordinator:

During the preview period of the 2016–17 California Assessment of Student Performance and Progress (CAASPP) public Web reporting site, some local educational agencies (LEAs) identified a small number of cases in which test results did not appear to aggregate as expected to their district or charter school summaries. The CDE delayed the release of the statewide test results in order to investigate these reported cases.

The issue impacts only the CAASPP public Web reporting site and the research files available from that site for 2016–17. **Please be assured that the individual student achievement levels and scale scores that have been reported to your LEA or direct funded charter school are correct.**

Once we complete our analysis and the new release date is finalized, the information will be provided to LEAs along with details and timeline for accessing the embargoed Web site. LEAs will have an opportunity, before the public release, to review the state, county, district, and/or school CAASPP reports once again to verify that the anticipated results are displayed and that all schools in the LEA are included.

It is our goal to provide accurate reports that contribute to the best possible decisions for your students' education. Thank you for your continued support of CAASPP.

Sincerely,

Mary Anne J. Arcilla
Senior Director for Operations
ETS CAASPP
