**Subject:** CAASPP--iOS Version 9.2 for Mobile Apple Devices Is Now Supported

*Measuring the Power of Learning.™*

Dear LEA CAASPP Coordinator:

Local educational agencies (LEAs) using earlier versions of the iOS operating system on mobile Apple devices may now upgrade to the recently released iOS version 9.2.

**Please note the following:**

- Users of earlier versions of the iOS operating system may continue to use these platforms through the scheduled Test Administrator Interface downtime. This downtime will occur from **9 p.m. Pacific Time (PT) on Wednesday, January 13 through 9 p.m. PT on Monday, January 18, 2016.**
- Only users of supported iOS operating systems (i.e., iOS 7.0–7.1, 8.0–8.2, and 9.2) will be able to access both the interim and summative assessments after this scheduled downtime concludes.

It is very important that all LEAs update all devices used to administer the interim assessments and summative assessments (i.e., Smarter Balanced and California Alternate Assessments) for English language arts/literacy and mathematics. Verify that these devices use operating systems and secure browsers that are supported for the 2015–16 test administration of the California Assessment of Student Performance and Progress (CAASPP) online assessments. For a full list of supported operating systems and secure browsers, visit the [CAASPP Secure Browsers Web page](#), which can be accessed by selecting the [**Secure Browsers**] button on the home page of the [CAASPP Portal](#) Web site.

Questions about the release of iOS 9.2 and all other topics regarding CAASPP administration should be directed to CalTAC by phone at 800-955-2954 or by e-mail at [caltac@ets.org](mailto:caltac@ets.org).

Sincerely,

California Technical Assistance Center
