Guide Content

The California Alternate Assessment English Language Arts (ELA) Practice Test Scoring Guides provide details about the items, student response types, correct responses, and related scoring considerations for the California Alternate Assessment Practice Test items. The items selected for the Practice Test are designed to reflect

- a broad coverage of claims and targets that closely mirror the summative blueprint.
- a range of student response types.
- a breadth of difficulty levels across the items, ranging from easier to more difficult items.

It is important to note that all student response types are not fully represented on every practice test, but a distribution can be observed across all the practice tests. The items presented are reflective of refinements and adjustments to language based on pilot test results and expert recommendations from both content and accessibility perspectives.

Within this guide, each item is presented with the following information:

- Grade: Grade level for the item
- Category: a broad content area that contains related targets and standards (i.e., Writing)
- Core Content Connector (Connector): Alternative achievement standard linked to a Common Core State Standard (CCSS)
- Tier: Level that identifies the complexity of an item. Tier levels are 1, 2, and 3.
- Static presentation of the item: static presentation of item from test administration system
- Static presentation of student response field(s): static presentation of response field from test administration system
- Answer key or exemplar: expected student response or example response from score point value
- Rubric and applicable score points for each item: score point representations for student responses

The following items are representative of the kinds of items that students can expect to experience when taking California Alternative ELA Assessment.

Piedras Blancas

Elephant seals

Elephant seal pups

The Piedras Blancas Elephant Seal Rookery
Every year, many elephant seals arrive in California at the rookery at Piedras Blancas. A rookery is a large, sandy beach where elephant seals meet. There, elephant seals play and rest together.

Female elephant seals usually arrive at Piedras Blancas between December and February. Shortly after arriving, mother elephant seals give birth to their pups.
Elephant seal pups have broad, smooth heads. Pups also have different color fur than adults. Adult giraffes are taller than humans.

By the end of March, most elephant seal pups leave the beach.
Where can elephant seals be found?

A

Piedras Blancas

B

Redwood National Park

C

Sierra Nevada Mountains

Grocery store

Avocados

Store manager
Sara works at a grocery store. But she feels that she always makes mistakes. One day, the store manager, Carol, tells Sara to stack the avocado bins again. Carol reminds Sara that the ripe, softer avocados should be placed at the top.

Later, Sara starts unloading some boxes of fruit. Carol tells Sara that the fruits are grouped incorrectly. Carol kindly shows Sara how to correctly group the fruits.
Sara takes notes. This will help her do a better job next time.

Sara continues to persist at her job. She remains positive about her work skills and is sure she will improve.

Geyser

Old Faithful

Old Faithful is a famous geyser in Yellowstone National Park.

A geyser is a hot spring that shoots water and steam from underground into the air.
Old Faithful is not the biggest or tallest geyser in Yellowstone, but people find it the most interesting. So, many people visit Old Faithful every year.

Old Faithful got its name because it erupts regularly. There have been over a million eruptions recorded. People predict future eruptions based on how long it has been since the last one. If you go to see Old Faithful, you can check prediction times posted around the park area.

Old Faithful is fascinating to see!

**Cycling**

Cycling, or bike riding, is a way to travel from one place to another. Many people cycle to places like work or school. There are several reasons why cycling is a better way to travel than riding in a vehicle.

Cycling is a great way to exercise. Many people choose this form of transportation so that they can exercise, while also getting where they need to go.
Cycling can also be better for the environment than driving vehicles or riding a bus. Vehicles use gasoline and oil that cause pollution. Bicycles do not use gasoline or oil. Cycling can therefore help the air to be cleaner, and that is better for the environment.

When more people cycle instead of using a vehicle, there is less traffic on the roads. This can make roads safer for both cyclists and drivers.

More exercise, cleaner air, and safer roads are three great benefits of cycling.
