Introduction to Practice Test Scoring Guide

This California Science Test (CAST) practice test scoring guide offers details about items, student response types, correct responses, and related scoring considerations for the practice test items. These items have been selected to show some of the new approaches to measuring the California Next Generation Science Standards (CA NGSS) that can be found in the assessment. The practice test items are not fully representative of all possible item types included in the CAST. The practice test covers a selection of items from performance expectations assessed in grade eight.

This scoring guide should be used alongside the online practice tests, which can be accessed at <http://www.caaspp.org/practice-and-training/index.html>. Annotated responses are also available to help explain the rationale for each score point on selected constructed response items from the practice test at <https://www.caaspp.org/ta-resources/practice-training.html>.

The following information is presented in a metadata table. Metadata contains specific information about each item including the alignment of the item with the CA NGSS standards.

Item: The question number that corresponds to the question as it appears in the practice test

Key: Represents the correct answer(s) to the item or question and includes the score point value for the item and its parts (Items are worth either one or two points. For some technology-enhanced items, a screen capture of the correct answers is included. Exemplars and rubrics are provided for constructed response items.)

Performance Expectations (PE) Code: References the standards that describe what students should know and be able to do

Science and Engineering Practices (SEP): Descriptions of behaviors that students engage in as they investigate the natural world and design solutions

Disciplinary Core Ideas (DCI): Essential ideas in the science disciplines that all students should understand

Crosscutting Concepts (CCC): Interdisciplinary skills students should exhibit that unify the study of science and engineering through common application across fields

Item-Level Claim Statement (ILCS): A brief statement that illustrates how an item aligns with the PE

Example of Metadata

Item	Key	PE	SEP	DCI	CCC	ILCS
1	A (1 point)	MS- PS1-5	2. Developing and Using Models	PS1.B Chemical Reactions	5. Energy and Matter	Select the appropriate compo- nents to develop a model to il- lustrate the conservation of at- oms/mass.

Grade Eight Practice Test Items

Item	Key	PE	SEP	DCI	CCC	ILCS
1	C (1 point)	MS- PS1-5	2. Developing and Using Models	PS1.B Chemical Reactions	5. Energy and Matter	Select the appropriate components to develop a model to illustrate the conservation of atoms/mass.
2	First drop-down menu: dark-colored fish Second drop-down menu: cannot see them as well as fish of the other color (1 point)	MS- LS4-4	6. Constructing Explanations and Designing Solutions	LS4.B Natural Selection	2. Cause and Effect	Explain why one variation of the trait is more advantageous given the introduction of a predator to the environment.
3	C (1 point)	MS- ETS1-2	7. Engaging in Argument from Evidence	ETS1.B Developing Possible Solutions	N/A	Select the option that meets the two criteria and provides a supporting statement.

Grade Eight Practice Test Items

Item metadata table continuation showing items 4–6

Item	Key	PE	SEP	DCI	CCC	ILCS
4	Two-point item: Part A: D (1 point) Part B: First drop-down menu: increased Second drop-down menu: decreased (1 point)	MS-PS2-4	7. Engaging in Argument from Evidence	PS2.B Types of Interactions	4. Systems and System Models	Construct a sound argument using evidence from the data, that an increase in an objects mass, increases the magnitude of gravitational force acting on the object.
5	Row 1: Plan 2 (1 point)	MS-ETS1-2	7. Engaging in Argument from Evidence	ETS1.B Developing Possible Solutions	N/A	Match each of several designs with a list of the prioritized criteria and constraints or trade-offs in building materials for schools in an area where earthquakes occur.
6	First drop-down menu: support Second drop-down menu: increase, which will cause the use of freshwater (1 point)	MS-ESS3-4	7. Engaging in Argument from Evidence	ESS3.C Human Impacts on Earth Systems	2. Cause and Effect	Evaluate (with reasoning) whether the provided evidence/data are sufficient to defend the claim based on almond production and the effect it has on water supplies in California.

Item metadata table continuation showing item 7

Item	Key	PE	SEP	DCI	CCC	ILCS
7	Exemplars and rubric provided below.	MS-LS2-1	4. Analyzing and Interpreting Data	LS2.A Interdependent Relationships in Ecosystems	2. Cause and Effect	Explain how resource availability affects population growth and carrying capacities.

Exemplars and rubric for item 7:

2 point

Exemplar(s):

At point A, the paramecium population is growing rapidly because there's plenty of food. At point B, the growth rate slows down because now there are more paramecium and the food supply is limited.

OR

At Point A the paramecium are growing quickly because there is plenty of food but at Point B the food supply has decreased so the growth rate has slowed down.

Rubric:

The response includes that at point A resources are plentiful (unlimited) and the population can grow rapidly.

AND

The response includes that at point B, carrying capacity, resources are limited and so the growth rate slows down.

1 point

Rubric continues on the next page.

Rubric continues from previous page.

Exemplar(s):

At Point A there is a lot resources for the paramecium so the population can grow rapidly.

OR

At point B there is not enough resources to support any more growth.

OR

Because after the paramecium has reached its carrying capacity and there is not enough resources, growth has slowed down.

Rubric:

The response includes that at point A resources are plentiful (unlimited) and the population can grow rapidly.

OR

The response includes that at point B, carrying capacity, resources are limited and so the growth rate slows down.

0 point

Exemplar(s):

The population didn't change size, just that the resources were gone.

OR

The paramecium will find a new food source and continue to grow.

Rubric continues on the next page.

Rubric continues from previous page.

OR

*&YTT%#\$D

OR

I don't know; I was never taught this.

Rubric:

0-point should be awarded if a student attempts to answer the prompt but the response is incorrect or too vague (insufficient information provided) to receive credit

A score of 0 should also be given to responses that consist only of:

No relevant content provided

- no response is provided (e.g., blank)
- random keystrokes or nonsense verbiage
- punctuation mark(s) (e.g., ".")

Student's opinion of the test

Direct copy of the stimulus without any attempt to answer

Rubric continues on the next page.

Grade Eight Practice Test Items

Rubric continues from previous page.

Opinions or comments about random topics

I don't know, IDK (without further elaboration)

Responses that go on to provide an answer to the prompt should be scored based on the relevant part of the response.

Additional annotated samples for this prompt can be found at <https://www.caaspp.org/ta-resources/practice-training.html>.

Item metadata table continuation showing items 8–10

Item	Key	PE	SEP	DCI	CCC	ILCS
8	B (1 point)	MS-ESS3-2	4. Analyzing and Interpreting Data	ESS3.B Natural Hazards	1. Patterns	Evaluate the information provided on earthquakes and identify a pattern between the location and severity of a natural disaster.
9	Row 1: Does not show a field exists Row 2: Does show a field exists Row 3: Does not show a field exists Row 4: Does show a field exists (1 point)	MS-PS2-5	3. Planning and Carrying Out Investigations	PS2.B Types of Interactions	2. Cause and Effect	Evaluate data to determine if there is evidence that fields exert forces on nearby objects without direct contact.
10	Row 1: Plants, Animals Row 2: Plants Row 3: Plants Row 4: Plants, Animals (1 point)	MS-LS1-6	6. Constructing Explanations and Designing Solutions	LS1.C Organization for Matter and Energy Flow in Organisms	5. Energy and Matter	Explain the role of plants (or animals) in the cycling of matter.

Grade Eight Practice Test Items

Item metadata table continuation showing item 11

Item	Key	PE	SEP	DCI	CCC	ILCS
11	D (1 point)	MS- PS3-4	3. Planning and Carrying Out Investiga- tions	PS3.B Conserva- tion of Energy and Energy Transfer	3. Scale, Pro- portion, and Quantity	Select the suitable equipment necessary to investigate heat transfer.

Item metadata table continuation showing item 12

Item	Key	PE	SEP	DCI	CCC	ILCS
12	<p>Two-point item:</p> <p>Part A: In the column titled “Process” top to bottom, First box: Weathering and erosion of igneous rock</p> <p>Second box: Formation of sedimentary rock</p> <p>Third box: Formation of metamorphic rock</p> <p>Fourth box: Metamorphic rock changing to magma</p> <p>Fifth box: Magma or lava forming igneous rock.</p> <p>(1 point)</p> <p>Part B: A</p> <p>(1 point)</p>	MS-ESS2-1	2. Developing and Using Models	ESS2.A Earth's Materials and Systems	7. Stability and Change	Select the processes that represent the rock cycle and also identify the limitations to using a model.

Grade Eight Practice Test Items

Screen capture item 12 Part A key.

Item metadata table continuation showing items 13–14

Item	Key	PE	SEP	DCI	CCC	ILCS
13	C (1 point)	MS-LS3-1	2. Developing and Using Models	LS3.B Variation of Traits	6. Structure and Function	Develop and use a model to describe why structural changes to genes (mutations) located on chromosomes may affect proteins and may result in harmful, beneficial, or neutral effects to the structure and function of the organism.
14	C (1 point)	MS-ESS3-5	1. Asking Questions and Defining Problems	ESS3.D Global Climate Change	7. Stability and Change	Ask a testable question that could be used to evaluate global impacts from a volcano that has erupted.

Item metadata table continuation showing item 15

Item	Key	PE	SEP	DCI	CCC	ILCS
15	Exemplars and rubric provided below.	MS-LS2-4	7. Engaging in Argument from Evidence	LS2.C Ecosystem Dynamics, Functioning, and Resilience	7. Stability and Change	Link the evidence/data to a claim about how the impact of La Niña caused a change in the rate of photosynthesis within a tropical forest ecosystem.

Exemplars and rubric for item 15:

2 point

Exemplar(s):

The rate of photosynthesis will decrease. The graph shows that as light intensity decreases then CO₂ intake decreases too.

Rubric:

The response includes that the rate of photosynthesis will decrease.

AND

The response includes that the graph shows as light intensity decreases, the CO₂ uptake decreases.

1 point

Exemplar(s):

The rate of photosynthesis will decrease.

Rubric continues on the next page.

Grade Eight Practice Test Items

Rubric continues from previous page.

OR

With less sunlight, the plants take up less carbon dioxide.

Rubric:

The response includes that the rate of photosynthesis will decrease.

OR

The response includes that the graph shows as light intensity decreases, the CO₂ uptake decreases.

0 point

Exemplar(s):

The rate of photosynthesis will increase.

OR

The rate of photosynthesis will increase because of the warmer climate.

OR

Carbon dioxide uptake will increase.

OR

- punctuation mark(s) (e.g., ".")

Student's opinion of the test

Direct copy of the stimulus without any attempt to answer

Opinions or comments about random topics

I don't know, IDK (without further elaboration)

Responses that go on to provide an answer to the prompt should be scored based on the relevant part of the response.

Additional annotated samples for this prompt can be found at <https://www.caaspp.org/ta-resources/practice-training.html>.

Grade Eight Practice Test Items

Item metadata table continuation showing items 16–20

Item	Key	PE	SEP	DCI	CCC	ILCS
16	A (1 point)	MS-LS1-4	7. Engaging in Argument from Evidence	LS1.B Growth and Development of Organisms	2. Cause and Effect	Identify evidence that is irrelevant/invalid and would not support the argument that certain flower colors attract more pollinators.
17	A (1 point)	MS-PS4-1	5. Using Mathematics and Computational Thinking	PS4.A Wave Properties	1. Patterns	Use the model to identify how the energy of the wave changes based on a change in amplitude.
18	First drop-down menu: pink Second drop-down menu: basic (1 point)	MS-LS1-5	6. Constructing explanations and Designing Solutions	LS1.B growth and Development of Organisms	2.Cause and Effect	Select the terms that complete the sentence, based on the student’s investigation and collected data on plant color and soil pH.
19	Fourth box at 105 minutes and 0.63 meters per second (1 point)	MS-PS3-1	4. Analyzing and Interpreting Data	PS3.A Definitions of Energy	3. Scale, Proportion, and Quantity	State that increasing an object’s speed results in an increase of the object’s kinetic energy proportional to the square of its speed.
20	First, second, and third options (1 point)	MS-ESS1-4	6. Constructing Explanations and Designing Solutions	ESS1.C The History of Planet Earth	3. Scale, Proportion, and Quantity	Use scientific concepts, principles, and theories to explain how the evidence supports a conclusion about Earth’s history based on sedimentary rock layers.

Item metadata table continuation showing item 21

Item	Key	PE	SEP	DCI	CCC	ILCS
21	<p>Two-point item:</p> <p>Part A:</p> <p>Label for arrow pointing from Sedimentary rock to Metamorphic rock: Heating under pressure</p> <p>Label for arrow pointing from Metamorphic rock to Magma: Melting</p> <p>Label for arrow pointing from Magma to Igneous rock: Solidification</p> <p>Label for arrow pointing from Igneous rock to Sedimentary rock: Erosion and deposition (1 point)</p> <p>Part B: D (1 point)</p>	MS-ESS2-1	2. Developing and Using Models	ESS2.A Earth's Materials and Systems	7. Stability and Change	Select the processes that represent mechanisms and behaviors within the rock cycle.

Grade Eight Practice Test Items

Screen capture item 21 Part A key.

Item metadata table continuation showing items 22–23

Item	Key	PE	SEP	DCI	CCC	ILCS
22	D (1 point)	MS-LS4-3	4. Analyzing and Interpreting Data	LS4.A Evidence of Common Ancestry and Diversity	1. Patterns	Analyze pictorial data to compare patterns of similarities in the embryological development across multiple species to identify relationships not evident in the fully formed anatomy.
23	Exemplars and rubric provided below.	MS-PS1-3	8. Obtaining, Evaluating and Communicating Information	PS1.B Chemical Reactions	6. Structure and Function	Evaluate the information given on the energy used to make plastic bottles and the impact manufacturing has on natural resources.

Exemplars and rubric for item 23:

2 point

Exemplar(s):

Plastic B comes from corn, which is a renewable resource. Plastic A comes from oil, which is a nonrenewable resource. It takes less energy to make Plastic B than to make Plastic A, so making bottles out of Plastic B will conserve energy.

OR

Plastic A is a nonrenewable resource so it wouldn't make sense to use it when you can use Plastic B, which is a renewable resource. It takes less energy to make something out of a renewable resource.

Rubric:

The response includes that the raw material for Plastic B comes from a renewable resource (corn), but the raw material for Plastic A comes from a nonrenewable resource (oil).

AND

The response includes that it takes less energy to make Plastic B than it does to make Plastic A.

1 point

Exemplar(s):

Plastic B comes from corn, which you plant more of every year and Plastic A comes from oil, which takes millions of years to make.

OR

Rubric continues on the next page.

Grade Eight Practice Test Items

Rubric continues from previous page

It takes less energy to make plastic B than plastic A, so it will save more natural resources.

OR

It takes more energy to make plastic A, so I wouldn't use that one.

Rubric:

The response includes that the raw material for Plastic B comes from a renewable resource (corn), but the raw material for Plastic A comes from a nonrenewable resource.

OR

The response includes that it takes less energy to make Plastic B than it does to make Plastic A.

0 point

Exemplar(s):

It takes the same amount of energy when you are making stuff.

OR

Plastic is recyclable.

OR

Plastic A will be easier to use because it is made from oil.

Rubric continues on the next page.

Rubric continues from previous page

Opinions or comments about random topics

I don't know, IDK (without further elaboration)

Responses that go on to provide an answer to the prompt should be scored based on the relevant part of the response.

Item metadata table continuation showing items 24–26

Item	Key	PE	SEP	DCI	CCC	ILCS
24	First and third options (1 point)	MS-LS4-4	6. Constructing Explanations and Designing Solutions	LS4.B Natural Selection	2. Cause and Effect	Explain how the increasing frequency for plant height at a certain elevation of one plant species is advantageous.
25	C (1 point)	MS-PS1-5	2. Developing and Using Models	PS1.B Chemical Reactions	5. Energy and Matter	Select the appropriate components to complete the model to illustrate the conservation of atoms/mass.
26	Two-point item: Part A: First drop-down menu: plant Second drop-down menu: has a cell wall (1 point) Part B: C (1 point)	MS-LS1-2	2. Developing and Using Models	LS1.A Structure and Function	6. Structure and Function	Select the terms that complete the sentence based on the students' comparison of two cells and identify the function of the nucleus.

Item metadata table continuation showing items 27–28

Item	Key	PE	SEP	DCI	CCC	ILCS
27	A (1 point)	MS-ESS2-4	2. Developing and Using Models	ESS2.C The Roles of Water in Earth's Surface Processes	5. Energy and Matter	Identify the processes operating within the water cycle and the role living organisms have on the water cycle.
28	First drop-down menu: cause a decrease in the number of native, beneficial plants Second drop-down menu: only introduce fish that cannot reproduce (1 point)	MS-LS2-5	7. Engaging in Argument from Evidence	LS2.C Ecosystem Dynamics, Functioning, and Resilience	7. Stability and Change	Identify possible unanticipated effects of a design solution that includes native and nonnative species within a lake ecosystem.

Grade Eight Practice Test Items

Item metadata table continuation showing items 29–30

Item	Key	PE	SEP	DCI	CCC	ILCS
29	Two-point item: Part A: Row 1: Does not require carrying an external source of energy Row 2: Does not require carrying an external source of energy Row 3: Requires carrying an external source of energy Row 4: Requires carrying an external source of energy. (1 point) Part B: A (1 point)	MS-ETS1-3	4.Analyzing and Interpreting Data	ETS1.B Developing Possible Solutions	N/A	Identify relationships in the data sets, including relationships between design solutions and given criteria and constraints.
30	B (1 point)	MS-PS2-2	3. Planning and Carrying Out Investigations	PS2.A Forces and Motion	7. Stability and Change	Identify that if the results of external forces are exerted by objects in a specific direction and do not balance each other, then the system's velocity in that direction changes.

Item metadata table continuation showing items 31–32

Item	Key	PE	SEP	DCI	CCC	ILCS
31	<p>Row 1: Reuses water</p> <p>Row 2: Reduces water use</p> <p>Row 3: Provides other source of water</p> <p>(1 point)</p>	MS-ESS3-3	6. Constructing Explanations and Designing Solutions	ESS3.C Human Impacts on Earth Systems	2. Cause and Effect	Propose several different processes to monitor and/or minimize the impact of human activity on water supplies.
32	<p>Two-point item:</p> <p>Part A: Third and fifth options.</p> <p>(1 point)</p> <p>Part B:</p> <p>Row 1: Improves the rate of heating</p> <p>Row 2: Reduces the rate of heating</p> <p>Row 3: Improves the rate of heating</p> <p>Row 4: Reduces the rate of heating</p> <p>(1 point)</p>	MS-ETS1-1	1. Asking Questions and Defining Problems	ETS1.A Defining and Delimiting Engineering Problems	Influence of Science, Engineering, and Technology on Society and the Natural World	Identify how to address factors in designing a solar cooker that heats food faster than a conventional oven.

Grade Eight Practice Test Items

Item metadata table continuation showing items 33–37

Item	Key	PE	SEP	DCI	CCC	ILCS
33	C (1 point)	MS-ESS1-2	2. Developing and Using Models	ESS1.B Earth and the Solar System	4. Systems and System Models	Identify the locations of several celestial objects within the solar system, including the Earth, to complete the model.
34	First drop-down menu: decreases Second drop-down menu: increases (1 point)	MS-LS2-1	4. Analyzing and Interpreting Data	LS2.A Interdependent Relationships in Ecosystems	2. Cause and Effect	Identify patterns of change based on the field study of the Anderson’s thistle and the Canada thistle.
35	Second and fifth options (1 point)	MS-LS2-1	4. Analyzing and Interpreting Data	LS2.A Interdependent Relationships in Ecosystems	2. Cause and Effect	Predict the likely outcome for the distribution of the plant populations over time.
36	C (1 point)	MS-LS2-2	6. Constructing Explanations and Designing Solutions	LS2.A Interdependent relationships in Ecosystems	1. Patterns	Predict what effect the removal of the Canada thistle population would have on the three insect populations.
37	Exemplars and rubric provided below.	MS-LS2-2	6. Constructing Explanations and Designing Solutions	LS2.A Interdependent Relationships in Ecosystems	1. Patterns	Predict what would occur to both plant populations with the addition of weevils into the ecosystem.

Exemplars and rubric for item 37:

2 point

Exemplar(s):

Because both weevils eat the Canada thistle, the Canada thistle population will decrease first, while the Anderson's thistle population may increase or stay the same at first.

OR

The Canada thistle population will decrease and the Anderson's thistle population will increase because both weevils eat the Canada thistle first.

Rubric:

The response includes that the Anderson's thistle population will increase or remain constant and the Canada thistle will decrease.

AND

The response includes that this is because the stem mining weevil and the flowerhead weevil eat Canada thistle first.

1 point

Exemplar(s):

The Canada thistle will decrease and the Anderson's thistle will increase.

OR

Rubric continues on the next page.

Grade Eight Practice Test Items

Rubric continues from previous page.

Because both weevils eat the Canada thistle, the population of Canada thistle will decrease first.

OR

The Canada thistle will decrease because both weevils eat that first.

Rubric:

The response includes that the Anderson's thistle population will increase or remain constant and the Canada thistle will decrease or that this is because the stem mining weevil and the flowerhead weevil eat Canada thistle first.

OR

The response includes that the Anderson's thistle population will increase or remain constant and the Canada thistle will decrease or that this is because the stem mining weevil and the flowerhead weevil eat Canada thistle first.

0 point

Exemplar(s):

Eventually the cold weather will come and kill off all the weevils so the thistles can grow again.

OR

The thistle populations will decrease.

OR

*&YTT%\$#\$D

Rubric continues on the next page.

Rubric continues from previous page.

OR

I don't know; I was never taught this.

Rubric:

0-point should be awarded if a student attempts to answer the prompt but the response is incorrect or too vague (insufficient information provided) to receive credit

A score of 0 should also be given to responses that consist only of:

No relevant content provided

- no response is provided (e.g., blank)
- random keystrokes or nonsense verbiage
- punctuation mark(s) (e.g., ".")

Student's opinion of the test

Direct copy of the stimulus without any attempt to answer

Opinions or comments about random topics

I don't know, IDK (without further elaboration)

Responses that go on to provide an answer to the prompt should be scored based on the relevant part of the response.

Grade Eight Practice Test Items

Item metadata table continuation showing items 38–41

Item	Key	PE	SEP	DCI	CCC	ILCS
38	Row 1: Criteria Row 2: Criteria Row 3: Con- straints Row 4: Con- straints (1 point)	MS-LS2-5	7. Engaging in Argument from Evidence	ETS1.B Develop- ing Possible Solu- tions	7. Stability and Change	Identify the criteria and/or con- straints that resulted with the addition of the weevils into the ecosystem.
39	B (1 point)	MS-LS2-5	7. Engaging in Argument from Evidence	ETS1.B Develop- ing Possible Solu- tions	7. Stability and Change	Select the best design to in- crease the Anderson’s thistle and provide justification for the selection based on evidence.
40	B (1 point)	MS-ESS3-5	1. Asking Questions and Defining Problems	ESS3.D Global Climate Change	7. Stability and Change	Identify questions about pat- terns in data that connect nat- ural processes and human ac- tivities to changes in global temperatures and carbon diox- ide and other greenhouse gases over the past century.
41	First drop-down menu: model Second drop- down menu: sunlight (1 point)	MS-ESS3-4	7. Engaging in Argument from Evidence	ESS3.C Human Impacts on Earth Systems	2. Cause and Effect	Identify a potential source of evidence/data that could be used to support their claim about greenhouses.

Item metadata table continuation showing items 42–45

Item	Key	PE	SEP	DCI	CCC	ILCS
42	First drop-down menu: 2 Second drop-down menu: 1 Third drop-down menu: 3 (1 point)	MS-ESS2-6	2. Developing and Using Models	ESS2.D Weather and Climate	4. Systems and System Models	Add labels to the model to identify relationships between components affecting climate, including differences in temperature changes and thermal energy transfer.
43	Two-point item: Part A: Student 2 (1 point) Part B: Second and third options (1 point)	MS-ESS3-4	7. Engaging in Argument from Evidence	ESS3.C Human Impacts on Earth Systems	2. Cause and Effect	Construct an argument in support/opposition for Prediction 1 using the data provided as evidence of the increased use of fossil fuels.
44	First and third options (1 point)	MS-ESS3-4	7. Engaging in Argument from Evidence	ESS3.C Human Impacts on Earth Systems	2. Cause and Effect	Evaluate (with reasoning) whether the provided evidence/data is sufficient to defend the claim for Prediction 2.
45	First drop-down menu: graph Second drop-down menu: town's (1 point)	MS-ESS3-4	7. Engaging in Argument from Evidence	ESS3.C Human Impacts on Earth Systems	2. Cause and Effect	Identify a potential source of evidence/data that could be used to support the claim for the increased use of fossil fuels.

Grade Eight Practice Test Items
